# Invention Cubes

Dear Parents,

Our class has been learning about inventors and their inventions. Now, your child will be making an “inventor/invention box” to display at school. These boxes will be due on \_\_\_\_\_.

The directions for the boxes are listed below:

1. Read about your inventor! There are many online sites that have wonderful information. Two such sites are:  
[www.idealfinder.com/history/of\\_inventors.htm](http://www.idealfinder.com/history/of_inventors.htm)  
[www.enchantedlearning.com](http://www.enchantedlearning.com)
2. Neatly fill out and illustrate the attached worksheets. Use **COMPLETE SENTENCES** and use your best handwriting. Be sure to make detailed illustrations. (Actual photographs may also be printed and used).
3. Cut out and glue the worksheets to a cube tissue box. (The information about YOU goes on the bottom!)
4. Important: **NOTHING** goes on the top of the box!

Have a wonderful time learning and creating!
